

The background of the entire page is a photograph of a long, curved tunnel or walkway. The structure is made of dark metal beams forming a series of arches, with translucent, ribbed glass panels filling the spaces between the beams. The perspective is from the end of the tunnel, looking down its length. A person is visible in the distance, walking away from the camera. The lighting is bright, suggesting an outdoor or well-lit indoor environment.

SAFETY & SECURITY FILM IN A BUSY PUBLIC AREA

Project by **SOLARSHIELD**

PROJECT LOCATION: Poplar, London

CLIENT NAME: Docklands Light Railway

CASE STUDY OVERVIEW

INITIAL PROBLEM

The Unique curved toughened glass walkway at Poplar DLR link bridge, is a very busy area linking the Poplar station to Canary Wharf & spans the Railway, Road & pathway. DLR were concerned that vandalism or spontaneous breakage of the toughened glass could pose a hazard to the Public.

PRODUCT SPECIFIED & INSTALLED

The 3M Ultra-flex system comprising of a clear Supreme strength Safety & Security film (3M Ultra S800) & an edge retention system (dow corning 995 black structural sealant) were installed to contain the glazing in place in the event of damage or breakage.
